

## Universal Design

In addition to aesthetically pleasing designs, the Level Entry Shower System™ provides accessible, safer, functional bathing spaces that are easier to clean (mold and mildew resistant), for all ages.

### NO CURB REQUIRED

Shower curbs are passé. They are unnecessary impediments, difficult to clean, and difficult to properly waterproof for long term protection. The curb is both a physical and visual “break” in the flow of the tiled bath floor.

# The New Standard

for Shower Design and Construction

The Vim Level Entry Shower System™ represents an evolution in the comfort, functionality, and durability of the bathroom.

By removing the need for curbs, providing the industry's best waterproofing process, and assuring the proper pitch-to-drain, the system makes the bathroom -

- Easy to clean and maintain
- Attractive, spa-like design
- Safe and Accessible
- Resistant to mold and mildew
- Water tight - protects against water damage
- Sanitary - No permeable mud-bed substrate materials to absorb body fluids and organic matter
